

Steps to setup and installation:

Firstly we need to create environment , Django installation , Project and app creation steps for that:

- 1) Create virtual environment :
Command: `py -m venv myve`
- 2) Activate the virtual environment using activate batch file
Command: `myve\Scripts\activate.bat`
- 3) Django installation
Command: `pip install django`

At same time we also installed requires libraries.
Pandas, numpy, scikit-learn, joblib

- 4) Create project
Command: `django-admin startproject priceOfHouse`
 : `cd priceOfHouse`
- 5) Create app in project
Command: `py manage.py startapp priceOfHouseapp`

This is django setup and installation
